

RCSI Colles Portal

THE COLLES PORTAL IS A WEB-BASED SYSTEM DESIGNED TO SUPPORT THE COMPETENCY DEVELOPMENT AND ASSESSMENT OF SURGICAL TRAINEES.

The key benefit of the portal is that from one location, you, the trainer can access the required information and complete all the steps necessary to support surgical training.

Secure and safe environment with
over 1,200 users

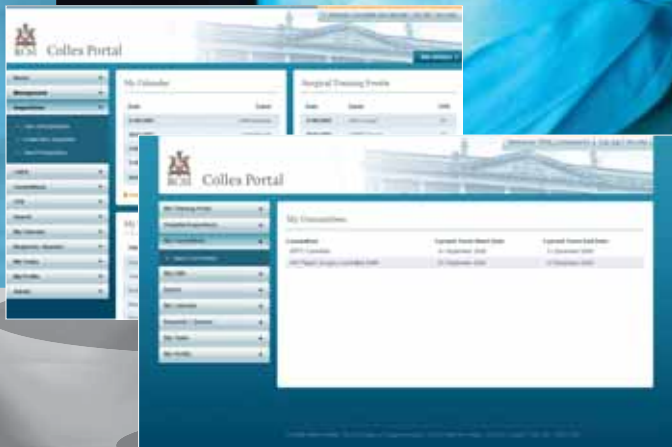

BENEFITS:

- Designed to have the flexibility to support the different requirements of each surgical speciality.
- Streamlined and customised content for each user, so each user sees only his/her unique tasks, calendar items, committees, CAPA sessions etc.
- Designed to provide a secure and safe environment for all data.
- In addition to training, it will support surgeons in the maintenance of professional competence. Surgeons who enroll in RCSI's Continuing Medical Education (CME) programme can manage their CME in the portal.

Furthermore the portal will enable, for the first time, all the key stakeholders in surgical training to collaborate using a single tool. This is a significant accomplishment that will include over 1,200 users, who vary from trainees, to trainers and Programme Directors, the SAC, the Medical Council, and the HSE Medical Manpower Managers. The portal will provide different functionality to each of these user groups.

The portal's key functionality is in the areas of trainee assessments, training post management and inspections, matching trainees to training posts, committee management and CME.

Inspection and trainee allocation history

Rank trainees who are interested in your posts

KEY FUNCTIONALITY FOR TRAINERS:

In the case of a trainer, here is some of the key functionality the portal will provide;

General functionality

- » View the training and assessment history for all trainees.
- » View the inspection and trainee allocation history for all training posts.
- » Publish your profile (your contact information, interests and availability to train etc). View other user profiles.

Trainee assessments

- » View the detailed history assessments for your current and your last trainees.
- » Complete online assessment forms for your trainees.
- » As an assessment panel member, view the detailed assessments and assessment outcome for each trainee in the session.

Matching trainees to posts

- » If your speciality chooses to use the portal's ranking system, then you can rank the trainees who are interested in your training posts and trainees will be matched to posts based on this ranking.
- » Or your Programme Manager can simply allocate trainees to posts.

Inspecting training posts

- » If you are an inspector you can complete and submit an inspection report.
- » You can request an inspection of one of your training posts or of your hospital.

If you are a committee member,

- » You can view the agenda, documents, tasks to be completed etc. for your committee meetings.
- » Confirm your attendance or submit apologies for future meetings.

If you enroll in CME,

- » RCSI activities are automatically added to your profile and you can record non-RCSI activities.
- » View your status versus CME requirements.
